

**</GirlsCodeMonth/>**

**June 16-17, 24 2018**

**Mitchell Park Community Center**

## **What is GirlsCodeMonth?**

GirlsCodeMonth is a cost-free, two-week long summer educational series for girls to learn the fundamentals of coding. The event consists of three parts: a Workshop, Hackathon and Conference.

- Workshop: participants learn the basics of coding and learn to build a website
- Hackathon: build a real-world project and learn more complex coding techniques
- Conference: networking with professionals and other participants

## **What is your goal?**

Through this event, we hope to spark interest for programming in the girls in our community and kickstart future programming success in girls of the younger generation. We hope to provide girls from all backgrounds with the tools necessary to explore CS, and aid them to form long-lasting networks with other girls who also love coding.

## **Why sponsor?**

As a sponsor, you will be able to distribute products to promote your company to influence the next generation of female technologists. Your product may be the first exposure they get to technology, and will influence what they think of technology going forward. Last but definitely not least, your money will be going towards supporting the next generation of female coders!

## **Where will your money go?**

Your money will go towards paying for swag, meals, and prizes for GirlsCodeMonth.

## **How else can you help?**

If you are not interested in sponsoring, you can also contribute by:

- Send mentors
- Host a workshop demonstrating your product

## Sponsorship Tiers

	Bronze \$125	Silver \$250	Gold \$500	Platinum \$1000
